1. The drawbridge in the port of Rügenwalde (Darlowo -P55/M60) has been removed. The official reason for its removal is that it was necessary to widen the narrowest part of the harbor in order to permit the entrance of larger vessels.*
2. The middle span of the reconstructed Debnicki Bridge across the Vistula River in Krakow is 65 m. long; the two outer spans are each 45 m. long. The road across the bridge is 12 m. wide.

* Comment: This bridge was considered the most vulnerable object in the port since damage to it would successfully block entrance to the entire port area.
